# MONITOR YOUR HEALTH WITH IMMUNOGRAM™

## A NEW BLOOD TEST FOR EVERYONE

### MEASURE THE COMPETENCY OF YOUR IMMUNE SYSTEM

### EVALUATE YOUR ABILITY TO FIGHT DISEASE

Baseline Lab Values For Monitoring Individual Health  
Test Panel is Drawn During Your Routine Lab Work and Annual Physical Examination  
Discuss Benefits With Your Family Physician

## Immunogram Allows the Monitoring Of

Individual Health  
Medication Regimens  
Fitness and Endurance  
Stress and Toxin  
Neuromuscular Health  
Immune System

## Immunogram Measures

- ROX: the bundled reserve oxygen which consists of NO and O<sub>2</sub> in the blood
- BOX: the builder oxygen that creates ROX, the bundled reserve oxygen in your blood
- ROX O<sub>2</sub>: only the amount of oxygen that is in the ROX bundle
- NO: the amount of NO made in the ROX bundle. NO molecules are important for various bodily processes that lead to overall good health. To make NO you need ROX. A decrease in NO leads to illness.

## Immunogram Allows Individuals To

Obtain a baseline individual health assay  
Personalize your medical treatment and/or program  
Help you and your physician monitor the health of your immune system  
Improve how well medications are working  
Optimize how well other interventions work  
Evaluate how well a specific treatment program is working  
Routine oxygen tests do not measure ROX  
This is the only test of its kind

# The Bio-Oxygen Pathway

The body is under constant attack by stress factors.

When a stress is induced on the body our immune system is stimulated and oxygen in our blood reacts by building reservoirs of bundled oxygen. This is known as ROX.

ROX at its "GOLDEN VALUE" will lead to homeostasis or good health.

When a stress is induced in the body and there is a ROX imbalance (too much or too little ROX), the body will also be imbalanced.

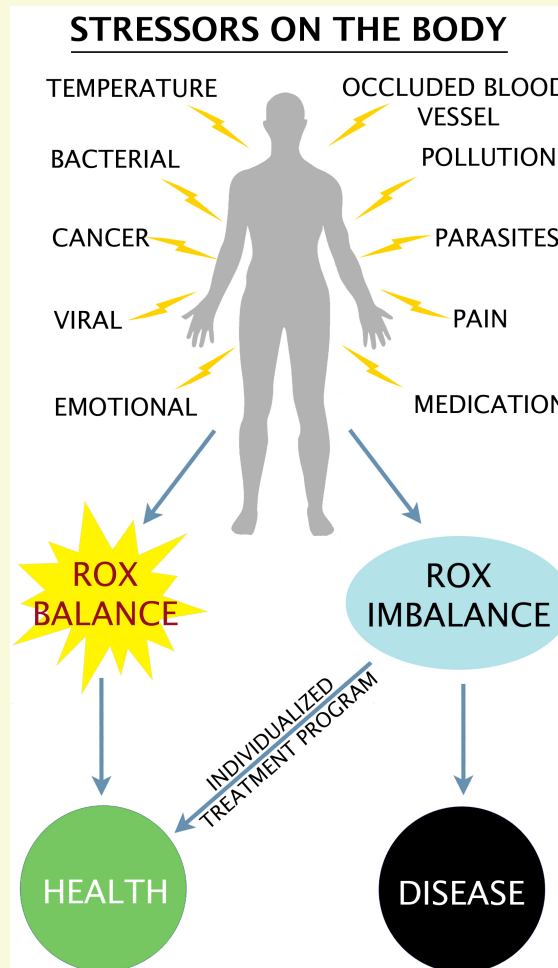

ROX Imbalance can lead to disease or illness.

A healthy immune system has a functioning mechanism to deliver oxygen to the site of attack.

The bundled oxygen, ROX, is not measured with routine blood analysis.

ROX can also assess medication effectiveness and its effect on your immune system.

These statements have not been evaluated by the US Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

## How It Works

Routine Labs Drawn During Annual Physical Examination.

Immunogram Panel Monitors Overall Individual Health.

- Obtain blood sample during routine lab work; no additional needle sticks
- Get a baseline individual health panel
- Optimize your Immune System and see improvement
- Plan individualized treatment program for you that may include:
  - Healthier Diet - Reduced Stress - Exercise
  - Meditation - Healthier Lifestyle - Medications

## Cost

\$25 copay
